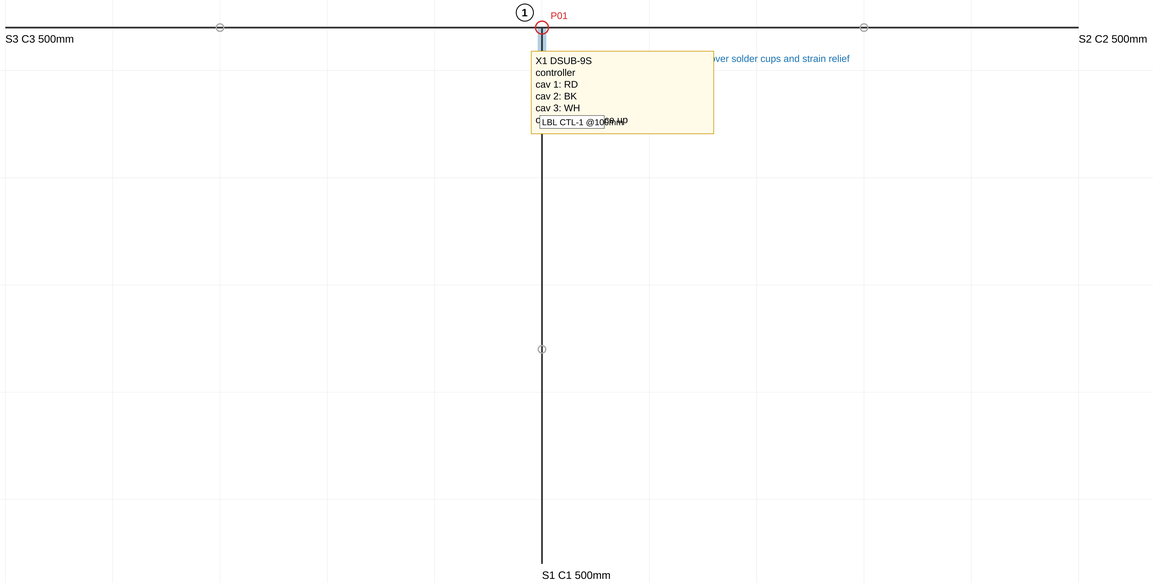
NOTE: DRAFT — overlay not released: build and measure one harness on the first board before release (VALIDATE_FIRST_BOARD)
NOTE: dimension convention: point-to-point between node reference planes (default — confirm)

INSPECTION — IPC/WHMA-A-620 Class 2 (record on traveller)
1. tug test every crimped termination (spec pull values on the termination map)
2. secondary lock / wedgelock closed — visual, every connector
3. label text + position legible against this overlay
4. bend radius at folds and breakouts ≥ cable datasheet minimum
5. final length check against this overlay (tolerances per drawing)
6. solder joints per IPC/WHMA-A-620 Class 2 (wetting, no stress relief damage)
7. program test: continuity; solder joints per IPC/WHMA-A-620 class 2



customer drawing: G-2002 rev A
board overlay rev: A-A date: 2025-12-01
program: GOLF-RF-2025
change summary: initial generation from data model
