NOTE: DRAFT — overlay not released: build and measure one harness on the first board before release (VALIDATE_FIRST_BOARD)
NOTE: dimension convention: connector face to connector face

iNSPECTION — IPC/WHMA-A-620 Class 2 (record on traveller)
1. tug test every crimped termination (spec pull values on the termination map)
2. secondary lock / wedgelock closed — visual, every connector
3. label text + position legible against this overlay
4. bend radius at folds and breakouts ≥ cable datasheet minimum
5. final length check against this overlay (tolerances per drawing)
6. program test: 100BASE-T1 link test end-to-end
