NOTE: DRAFT — overlay not released: build and measure one harness on the first board before release (VALIDATE_FIRST_BOARD)
NOTE: dimension convention: connector face to connector face

X2 CONN-MAT-ECU
ECU C (cut end)
cav 1: ETH-SPUR
cav 2: ETH-SPUR
orientation: latch toward board edge

X1 CONN-MAT-HDR
spur plug (factory end)
cav ?: ETH-SPUR
orientation: latch up

iNSPECTION — IPC/WHMA-A-620 Class 2 (record on traveller)

1. tug test every crimped termination (spec pull values on the termination map)
2. secondary lock / wedgelock closed — visual, every connector
3. label text + position legible against this overlay
4. bend radius at folds and breakouts ≥ cable datasheet minimum
5. final length check against this overlay (tolerances per drawing)
6. shield termination: 360° contact, fold-back per spec figure
7. program test: 100BASE-T1 link test; shield continuity

customer drawing: D-1002 rev B
board overlay rev: B-B date: 2025-11-03
program: ETHDTM-2025
change summary: initial generation from data model

0 100 200 mm — SCALE 1:1
